

Minecraft

Minecraft is a game where you make, mine and explore.

You can build a base, create a cave or ride a bike across the land.

With time, you can shape a wide space and give it a fun name.

In the game, players take care to stay safe.

When night comes, mobs wake and roam.

A creeper can make a loud bang, a spider can bite and a skeleton can fire an arrow.

To stay safe, make a gate, light a fire and hide inside your base.

You can tame a pet, give it a name and keep it by your side.

A tame wolf is brave, a pig is kind and a cat can scare off creepers.

You can trade with others, bake a cake or take a trip to a village.

There are two ways to play: Creative, where you have every item, and Survival, where you find and make things on your own.

In both, you can make tools, mine stone and create your dream home.

Minecraft is not just a game—it helps you plan, build and think.

You can make a place full of light, hope and fun.

With each step, Minecraft lets you play your own way.
